

G19138 - B1208PTV1-A 12VDC Apple® Blower Fan

To operate your fan connect both of the outer leads to 12VDC (+) and one of the inner leads to (-) as shown below. Note: You must connect both outer leads to (+), the fan will not operate if only one lead is connected. If you connected the signal output lead to (-), simply reconnect (-) to the other inner lead.
