

G25369 - Epicenter Tiny High Voltage 5VDC to 80VAC Voltage Converter

Tiny 5VDC voltage converter module is only 0.62" sq. x 0.66" tall. It has only 3 pins (+) 5VDC input, common, and 80VAC @ 800Hz output. Great for lighting neon bulbs from 5V or use a voltage multiplier (diodes & capacitors) to make a high voltage supply for strobes or Geiger counters. Note: Photo shows top and bottom view. Sold individually.
